PROGRAMMING WITH PYTHON

Q.1 Arrange the following steps to install pyCharm Community version on window.	
A. Click next to complete the installation process.	B. Click Browse to change the default location for installation.
C. Click next.	D. Run the downloaded .exe file. The setup window is displayed.
E. Download the pyCharm Community version from windows from the JetBrains Website using the following link: https://www.jetbrains.com/pycharm/download/#sections=windows	
Correct Answer: E, D, C, B, A	
Reference :Book name: Programming with python, Page no 13, Heading 1.6	

Q.2 Arrange the following steps to install the community version on Mac OS:	
A. Double- click the downloaded .dmg.file.	B. Drag the icon, PyCharm, to the application folder.
C. Downloaded the PyCharm Community version for Mac OS X from the JetBrains Website	
Correct Answer: C, A, B	
Reference :Book name: Programming with python, Page no 14, Heading 1.6	

Q.3 Which of the following clause is optional in Python and is usually useful for releasing external resources?	
A. Full.	B. Finally.
C. Finish.	D. Follow.
Correct Answer: B	
Reference :Book name: Programming with python, Page no 231	

Q.4 In Python, the interpreter raises an exception when its _____ occurs during execution.	
A. Corresponding error.	B. Following error.
C. Existing error.	D. Current error.
Correct Answer: A	
Reference :Book name: Programming with python, Page no 232, Heading 11.5	

Q.5 ____ refers to looking inside and represents the act of thinking about inner thoughts or actions.	
A. Intromission.	B. Introversion.
C. Introspection.	D. Introduction.
Correct Answer: C	
Reference :Book name: Programming with python, Page no 241, Heading 12.2

Q.6 The _____ function provides more information about my built-in entity.	
A. help()	B. hide()
C. play()	D. seek()
Correct Answer: A	
Reference :Book name: Programming with python, Page no 242	

Q.7 Which commands help in quitting the utility.	
A. reject()	B. end()
C. stop()	D. quit()
Correct Answer: D	
Reference :Book name: Programming with python, Page no 243	

Q.8 To accommodate flexibility, Python allows users to provide inputs using the ____ function.	
A. copy()	B. label()
C. Input()	D. Print()
Correct Answer: C	
Reference :Book name: Programming with python, Page no 56	

Q.9 Decision making is necessary to execute a code, provide a specific is fulfilled in such cases, ____ statements come in handy.	
A. Branching	B. importing
C. printing	D. Breaking
Correct Answer: A	
Reference :Book name: Programming with python, Page no 57, Heading 3.3	

Q.10 Python is a robust and _____ programming language, which is not widely in use.	
A. high level	B. low level
C. basic level	D. middle level
Correct Answer: A	
Reference :Book name: Programming with python, Page no 9, Heading 1.2	

Q.11 ____ is a smart Python Integrated Development Environment (IDE) for Mac OS, Linux, and Windows.	
A. Pysell	B. Pychart
C. Pycharm	D. Pysim
Correct Answer: C	
Reference :Book name: Programming with python, Page no 13, Heading 1.6	

Prepared by: Abrar Ahmed

Q.12 _____ in Python is a piece of memory with data in terms of values and series of related operations.	
A. graph	B. chart
C. table	D. object
Correct Answer: D	
Reference :Book name: Programming with python, Page no 28, Heading 2.2	

Q.13 A developer can use _____ interactively to create data types to understand Python objects.	
A. ILDE	B. ILED
C. IDEL	D. IDLE
Correct Answer: D	
Reference :Book name: Programming with python, Page no 30	

Q.14 Which of the following help to process the objects and are the part of the statements?	
A. Images	B. Characters
C. Expressions	D. Texts
Correct Answer: C	
Reference :Book name: Programming with python, Page no 51, Heading 3.2	

Q.15 Which of these is a new forms available only in the Python 3 X?	
A. Augmented assignment	B. Sequence assignment
C. Extended sequence packing	D. Extended sequence unpacking
Correct Answer: D	
Reference :Book name: Programming with python, Page no 53	

Q.16 In Python 2 , any number specified without decimals is of type _____	
A. fraction	B. integer
C. variable	D. whole number
Correct Answer: B	
Reference :Book name: Programming with python, Page no 11	

Q.17 _____ is a backslash, which act as a last character of the line to make the following line as a continuation of the correct current line.	
A. Statement separator	B. Statement continuation
C. Continuation line	D. Line connector
Correct Answer: C	
Reference :Book name: Programming with python, Page no 20, Heading 1.7	

Prepared by: Abrar Ahmed

Q.18 The _____ is shortform for else if.	
A. eliif	B. eif
C. eliif	D. elif
Correct Answer: D	
Reference :Book name: Programming with python, Page no 59	

Q.19 The _____ statement is used to withdraw from a function and go back to the from where the object was.	
A. loop	B. proceed
C. back	D. return
Correct Answer: D	
Reference :Book name: Programming with python, Page no 75, Heading 4.2.4	

Q.20 Which of the following are the numeric objects that Python supports? [Multiple Choice]	
A. Decimal	B. Complex numbers
C. Fractions	D. Segmentations
Correct Answer: A, B, C	
Reference :Book name: Programming with python, Page no 29, Heading 2.3	

Q.21 Which of the following are the useful numeric function offered by Python? [Multiple Choice]	
A. trigonometric	B. angular
C. logarithmic	D. hyperbolic
Correct Answer: A, D	
Reference :Book name: Programming with python, Page no 34, Heading 2.3.2	

Q.22 Which term represents the new list (result) among the following?	
A. No-list	B. Easy-list
C. New-list	D. Lastest-list
Correct Answer: C	
Reference :Book name: Programming with python, Page no 116	

Q.23 Which of the following is a strong feature if the Python?	
A. functions	B. expressions
C. iteration	D. iteration
Correct Answer: A	
Reference :Book name: Programming with python, Page no 132, Heading 7.2	

Q.24 What refers to an object that facilitates iterating over a set of items?	
A. sequencing	B. experimenting
C. iterator	D. iterable
Correct Answer: C	
Reference :Book name: Programming with python, Page no 132, Heading 7.2	

Prepared by: Abrar Ahmed

Q.25 Which of these is a java package facilitating Python scripts to access java class libraries flawlessly on the user's machines?	
A. JWPYthon	B. Jspython
C. Jrpython	D. Jpython
Correct Answer: D	
Reference :Book name: Programming with python, Page no 153, Heading 8.2	

Q.26 In a programming language, a developer passes an _____ either by value or role.	
A. analogy	B. assessment
C. argument	D. arrangement
Correct Answer: C	
Reference :Book name: Programming with python, Page no 178, Heading 9.2	

Q.27 Which is the process of converting structured data or object so that its original structure can be recovered later?	
A. Data structure.	B. Data symbolization.
C. Data system	D. Data serialization
Correct Answer: D	
Reference :Book name: Programming with python, Page no 198, Heading 10.2	

Q.28 _____ is a reliable solution for storing or transferring a data structure across a network.	
A. Deserialization	B. Serialization
C. Scrutinizing	D. Deforming
Correct Answer: B	
Reference :Book name: Programming with python, Page no 198, Heading 10.2	

Q.29 What is the process of restoring the stream to its original hierarchy?	
A. unpacking	B. unpickling
C. unseeing	D. unorganising
Correct Answer: B	
Reference :Book name: Programming with python, Page no 199, Heading 10.3	

Q.30 A _____ is a visual aid for a user to communicate with an application with the help of graphical symbol or indication.	
A. GIU	B. GUI
C. GIE	D. GEI
Correct Answer: B	
Reference :Book name: Programming with python, Page no 153, Heading 8.2	

Prepared by: Abrar Ahmed

Q31. A _____ is composed of modules, statements, objects and expressions.	
A. Python syntax	B. Python program
C. JPython syntax	D. JPython program
Correct Answer: B	
Reference: Book name: Programming with python, Page no 28, Heading 2.2	

Q32. The standard implementation of python is in portable _____ code	
A. ANCI	B. ANSI
C. ANPI	D. ANBI
Correct Answer: B	
Reference: Book name: Programming with python, Page no 10	

Q33. Which of the following are the difference between Python 2 and Python 3?	
a. Print	
b. Division with integers	
c. Utility	
d. Unicode support	
A. a, b, c and d	B. b, c and d
C. a, b and d	D. a, c and d
Correct Answer: C	
Reference: Book name: Programming with python, Page no 10-11, Heading 1.2.2	

Q34. Which term represents the new list(result) among the following	
A. no_list	B. easy_list
C. new_list	D. latest_list
Correct Answer: C	
Reference: Book name: Programming with python, Page no 116
