## UI/UX

|                                                                                                                                        |            |
|----------------------------------------------------------------------------------------------------------------------------------------|------------|
| Q.1 Which phase of the Responsive Work Design workflow consists of the processes called content migration and user acceptance testing? |            |
| A. Deploy                                                                                                                              | B. Develop |
| C. Discover                                                                                                                            | D. Design  |
| <b>Correct Answer: A</b>                                                                                                               |            |
| <b>Reference: Book Name: UI/UX, Page no 70</b>                                                                                         |            |

|                                                                                       |                    |
|---------------------------------------------------------------------------------------|--------------------|
| Q.2 _____ is intended to be explored on a spectrum of diverse experiences.            |                    |
| A. Content Layout                                                                     | B. Navigation      |
| C. Tab System                                                                         | D. Digital Content |
| <b>Correct Answer: D</b>                                                              |                    |
| <b>Reference: Book Name: UI/UX, Page no 71, Heading "Help plan for the way ahead"</b> |                    |

|                                                                                    |        |
|------------------------------------------------------------------------------------|--------|
| Q.3 Which of the following is not the normal screen width for designers?           |        |
| A. 320                                                                             | B. 460 |
| C. 760                                                                             | D. 960 |
| <b>Correct Answer: B</b>                                                           |        |
| <b>Reference: Book Name: UI/UX, Page no 87, Heading "Quick tips for designers"</b> |        |

|                                                             |                |
|-------------------------------------------------------------|----------------|
| Q.4 An adaptable matrix can be made using _____             |                |
| A. CSS3 Module                                              | B. XML         |
| C. HTML5                                                    | D. CSS2 Syntax |
| <b>Correct Answer: A</b>                                    |                |
| <b>Reference: Book Name: UI/UX, page no 86, Heading 4.5</b> |                |

|                                                        |                  |
|--------------------------------------------------------|------------------|
| Q.5 _____ don't work in Internet Explorer 8 and below. |                  |
| A. Adaptable Grids                                     | B. Viewpoints    |
| C. Spreadsheets                                        | D. Media queries |
| <b>Correct Answer: D</b>                               |                  |
| <b>Reference: Book Name: UI/UX, Page no 88</b>         |                  |

|                                                                               |             |
|-------------------------------------------------------------------------------|-------------|
| Q.6 Which of the following devices is not supported by Responsive Web Design? |             |
| A. Smartphone                                                                 | B. Notebook |
| C. Tablet                                                                     | D. Camera   |
| <b>Correct Answer: D</b>                                                      |             |
| <b>Reference: Book Name: UI/UX, Direct reference not available</b>            |             |

## Prepared by: Abrar Ahmed

Q.7 Which of the following technologies are used by Responsive Web Design to resize, hide, shrink, enlarge, and move the content on any screen?

- |                 |         |
|-----------------|---------|
| A. CSS          | B. Java |
| C. CSS and HTML | D. XML  |

**Correct Answer: C**

**Reference: Book Name: UI/UX, Page no 51, Heading 3.2**

Q.8 \_\_\_\_\_ is used to arrange the grid columns in proportion based on page element sizing.

- |                |          |
|----------------|----------|
| A. Fluid Grid  | B. Grid  |
| C. Liquid Grid | D. Fluid |

**Correct Answer: A**

**Reference: Book Name: UI/UX, Page no 57, Heading 3.4**

Q.9 Content audit should always be recorded in a \_\_\_\_\_, mainly because they are flexible.

- |              |                |
|--------------|----------------|
| A. Hierarchy | B. Spreadsheet |
| C. Tags      | D. HTML        |

**Correct Answer: B**

**Reference: Book Name: UI/UX, Page no 80, Heading 4.3**

Q.10 \_\_\_\_\_ concentrates on setting up an engaging interface with logic behaviors.

- |                       |                             |
|-----------------------|-----------------------------|
| A. Interaction Design | B. Information Architecture |
| C. Visual Design      | D. Dropdown List            |

**Correct Answer: A**

**Reference: Book Name: UI/UX, Page no 7, Heading "What is user interface design"**

Q.11 \_\_\_\_\_ is a navigation aid that allows the user to keep track of the location within programs.

- |               |                 |
|---------------|-----------------|
| A. Pagination | B. Tag          |
| C. Breadcrumb | D. Search Field |

**Correct Answer: C**

**Reference: Book Name: UI/UX, Page no 9, Table 1.2**

Q.12 Which of the following principles emphasizes the importance of designing the user interface to prevent users from making errors.

- |               |               |
|---------------|---------------|
| A. Feedback   | B. Visibility |
| C. Simplicity | D. Tolerance  |

**Correct Answer: D**

**Reference: Book Name: UI/UX, Page no 15**

|                                                                                                           |                                     |
|-----------------------------------------------------------------------------------------------------------|-------------------------------------|
| Q.13 _____ allows the user to speak in the normal everyday language in order to interact with the system. |                                     |
| A. Natural Language Interface                                                                             | B. Command Language Based Interface |
| C. Web Based Interface                                                                                    | D. Menu Based Interface             |
| <b>Correct Answer: A</b>                                                                                  |                                     |
| <b>Reference: Book Name: UI/UX, Page no 18</b>                                                            |                                     |

|                                                                                         |                 |
|-----------------------------------------------------------------------------------------|-----------------|
| Q.14 Which layer of the Progressive Enhancement uses JavaScript for improved usability? |                 |
| A. First Layer                                                                          | B. Second Layer |
| C. Third Layer                                                                          | D. Fourth Layer |
| <b>Correct Answer: C</b>                                                                |                 |
| <b>Reference: Book Name: UI/UX, Page no 60</b>                                          |                 |

|                                                                                                                              |           |
|------------------------------------------------------------------------------------------------------------------------------|-----------|
| Q.15 Which phase of the Responsive Work Design workflow consists of the processes called UX sketches and Interaction design? |           |
| A. Discover                                                                                                                  | B. Design |
| C. Develop                                                                                                                   | D. Deploy |
| <b>Correct Answer: B</b>                                                                                                     |           |
| <b>Reference: Book Name: UI/UX, Page no 68</b>                                                                               |           |

|                                                                                                                   |                      |
|-------------------------------------------------------------------------------------------------------------------|----------------------|
| Q.16 The footprint of the CSS file on slower devices, can be reduced by smart position of media queries and _____ |                      |
| A. Progressive Enhancement                                                                                        | B. Size Optimization |
| C. Low Load Time                                                                                                  | D. Breakpoints       |
| <b>Correct Answer: A</b>                                                                                          |                      |
| <b>Reference: Book Name: UI/UX, Page no 75</b>                                                                    |                      |

|                                                                                             |                |
|---------------------------------------------------------------------------------------------|----------------|
| Q.17 _____ are browser widths that have a media question presentation to change the format. |                |
| A. Spreadsheets                                                                             | B. Breakpoints |
| C. Stackings                                                                                | D. Tab Bars    |
| <b>Correct Answer: B</b>                                                                    |                |
| <b>Reference: Book Name: UI/UX, Page no 103</b>                                             |                |

|                                                                                                      |                  |
|------------------------------------------------------------------------------------------------------|------------------|
| Q.18 _____ is the action where all the content on a Website is checked and complied into a big list. |                  |
| A. Scripting                                                                                         | B. Content Audit |
| C. Deployment                                                                                        | D. Designing     |
| <b>Correct Answer: B</b>                                                                             |                  |
| <b>Reference: Book Name: UI/UX, Page no 80, Heading 4.3</b>                                          |                  |
