Programming with Microsoft Azure

Q.1 There is a _____ for each .NET Framework data provider within the .NET Framework	
A. Stored Procedure	B. Method Object
C. DB Connection	D. Command Object
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 66	

Q.2 A _____ is the best option to display data when it is not required to work on the data.	
A. Web Page	B. DataReader
C. XML Reader	D. DataPort
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 73	

Q.3 MSDTC uses the classes present in _____ for managing distributed transactions on cloud.	
A. System Uploads	B. System Transactions
C. System Cache	D. Transaction Scope
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 49	

Q.4 Which of the following method can be used to create a command for a specific connection?	
A. OleDbCommand	B. CreateCommand
C. SqlCommand	D. DbConnection
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 68	

Q.5 Which of the following commands do we have to enter to add the CORS Nuget package?	
A. Install-Package Microsoft.AspNet.WebApi	B. Install-Package Microsoft.AspNet.WebApi.Cors
C. Install-Package Microsoft.AspNet.WebApi.Cors;	D. Install-Package Microsoft.AspNet.WebApi.Cors;;
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 153	

Q.6 Which of the following regarding Application insight is false?	
A. It helps to improve performance and usability	B. It can be integrated with SQL Azure
C. It helps to monitor the live Web application	D. In case of mobile applications developers can use it to track and examine telemetry in combination with Visual Studio App Center
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 240

Q.7 An EF is an _____ tool built for ADO.NET	
A. ORM	B. XML Reader
C. Windows	D. Programming
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 83	

Q.8 _____ is one of the most powerful features that was first introduced in .NET Framework 3.5	
A. EntitySQL	B. LINQ
C. ADO .NET Data Provider	D. EF API
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 83	

Q.9 EF queries are converted to _____ queries for underlying databases	
A. XML	B. SQL
C. API	D. Reference
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 83	

Q.10 EDM consists of _____ primary parts	
A. Two	B. Five
C. Six	D. Three
Correct Answer: D	
Reference: Book Name: Programming with Azure, Page no 84	

Q.11 _____ involves creating heavy user traffic and measuring its response.	
A. Stress Test	B. Load Test
C. Compatibility Test	D. Performance Test
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 37	

Q.12 Which of these indicates whether sliding expiration is enabled?	
A. Absolute Expiration	B. Cache Policy
C. Sliding Expiration	D. Cache Memory
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 45	

Q.13 The validity of a cache item is based on the _____	
A. Memory used	B. Cache dependencies
C. Cache Directories	D. Cache Systems
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 45	

Prepared By Abrar Ahmed

Q.14 The _____ method is used to add the dependent cache item.	
A. Cache.Delete()	B. Cache.Save()
C. Cache.Insert()	D. Cache.Add()
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 46	

Q.15 There are _____ types of expiration policies available for cache expiration	
A. Two	B. Five
C. Three	D. Six
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 45	

Q.16 While executing a command. If _____ is used output parameters and return values cannot be obtained until closing of the DataReader	
A. StoredProcedure	B. CacheReader
C. ExecuteReader	D. CommandType
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 68	

Q.17 _____ method is used for executing a command, which cannot return a row.	
A. ExecuteNonQuery()	B. ExecuteReader()
C. ExecuteXMLReader()	D. ExecuteScalar()
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 68	

Q.18 An SOA defines _____ number of key roles.	
A. 2	B. 4
C. 5	D. 3
Correct Answer: D	
Reference: Book Name: Programming with Azure, Page no 15	

Q.19 Data warehouses and data mining applications use an _____ and Azure data factory to handle large chunks of data.	
A. API Service	B. Azure SQL data warehouse
C. Azure Cosmos DB	D. ASP.NET Service
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 33	

Q.20 _____ offers virtualization without the effort of buying and maintaining physical hardware	
A. Resource manager	B. Azure SQL Database
C. Azure VM	D. Azure Database
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 31	

Prepared By Abrar Ahmed

Q.21 Data is published to data stores, such as Azure SQL Data Warehouse to be utilized by _____ applications.

A. Business Intelligence (BI)

B. Azure SQL Database

C. Azure Portal

D. Data Factory

Correct Answer: A

Reference: Book Name: Programming with Azure, Page no 35

Q.22 In _____ class, a high-level abstraction of notification functionality is provided between the source application and SQL Server.

A. SqlNotificationRequest

B. SqlDependency

C. SqlCacheDependency

D. SqlCache

Correct Answer: B

Reference: Book Name: Programming with Azure, Page no 47

Q.23 Arrange the steps for cloud testing in proper sequence

A. Design test cases

B. Select cloud service provider

C. Step infrastructure

D. Develop user scenarios

E. Leverage cloud servers

F. Monitor testing goals

G. Deliver results

H. Start testing

A. C, A, B, D, E, H, F, G

B. C, A, B, D, E, G, F, H

C. D, A, B, C, E, H, F, G

D. G, A, B, C, E, H, F, D

Correct Answer: C

Reference: Book Name: Programming with Azure, Page no 38

Q.24 ASP.NET Web API refers to a framework that allows producing _____ services easily.

A. HTTP

B. HTML

C. XML

D. Java

Correct Answer: A

Reference: Book Name: Programming with Azure, Page no 121

Q.25 There are _____ main request methods.

A. 3

B. 5

C. 4

D. 2

Correct Answer: C

Reference: Book Name: Programming with Azure, Page no 123

Q.26 The _____ request header specifies the content type. also known as Multipurpose Internet Mail Extensions (MIME) type that the request expects as the response

A. Accept

B. Host

C. Connection

D. Keep-Alive

Correct Answer: A

Reference: Book Name: Programming with Azure, Page no 123

Prepared By Abrar Ahmed

Q.27 _____ was the first framework to be included with WCF.	
A. .NET Framework 3.0	B. .NET Framework 2.0
C. ASP.NET Web API	D. XML Web Framework
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 17	

Q.28 _____ is a framework that helps build HTTP-based services on top of the .NET Framework.	
A. .NET Framework 3.0	B. Windows Communication Framework
C. ASP.NET Web API	D. .NET Web API
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 17	

Q.29 Using an infrastructure-as-a-Service (IaaS), a user can _____	
A. Develop, test, deliver, and manage software applications	B. Rent IT infrastructures from a cloud provider
C. Use Gmail, provided he/she has an account	D. Set up or manage the core infrastructure of network
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 11	

Q.30 A good example of a distributed application is _____	
A. Collaboration application	B. Twitter
C. System application	D. Computer application
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 14	

Q.31 Data-driven workflows are also termed as _____	
A. Queries	B. Data Structure Store
C. Azure table storage	D. Pipelines
Correct Answer: D	
Reference: Book Name: Programming with Azure, Page no 35	

Q.32 _____ indicates that until the time the table entries do not change, the data will be present in the cache.	
A. Cache dependency on cached items	B. Cache dependency on a file
C. Cache dependency on Azure	D. Cache dependency on SQL
Correct Answer: D	
Reference: Book Name: Programming with Azure, Page no 46	

Q.33 Azure database for MySQL is based on _____	
A. ADO.NET	B. MySQL Server Engine
C. SQLite	D. DBMS
Correct Answer: B	
Reference: Book Name: Programming with Azure, Page no 100	

Prepared By Abrar Ahmed

Q.34 Azure Cosmos DB is similar to _____	
A. NoSQL database	B. MySQL
C. Oracle database	D. Relational databases
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 101	

Q.35 EF6 requires _____ support.	
A. .NET	B. Connector
C. Connector/.NET	D. SQL
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 102	

Q.36 Microsoft SQL Server database engine provides a relational _____ named as Azure SQL Database.	
A. Virtual Database	B. Infrastructure as a database (IAAS)
C. Database-As-A-Service(DBaaS)	D. Platform as a Service (PaaS)
Correct Answer: C	
Reference: Book Name: Programming with Azure, Page no 34	

Q.37 Which of the following are the Web services supported in .NET?	
A. ASP.NET Web Services, Windows Communication Foundation (WCF), ASP.NET Web API Services	B. ASP.NET Web Services, ASP.NET Core, ASP.NET Web API Services
C. ASP.NET Web Services, ASP.NET Core, ASP.NET MVC	D. ASP.NET Web Services, ASP.NET Web API, ASP.NET MVC
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 17, Heading 1.2.5	

Q.38 Can you rearrange the steps given below to edit or delete existing subscriptions?	
A. In the General section, click Subscription B. Click All Service option. C. Select Manage, Cancel subscription, or Upgrade subscription on the displayed menu bar. D. From the subscription page, select the required subscription.	
A. B, A, D, C	B. A, B, C, D
C. A, C, D, B	D. A, B, D, C
Correct Answer: A	
Reference: Book Name: Programming with Azure, Page no 29, Heading 2.1.3
