

Prepared By Abrar Ahmed

Database Management using SQL Server

Q.1 What can be retrieved with the code snippet. Select name, type_desc FROM sys. all_objects WHERE name LIKE '% query_store%'?	
A. List of queries in the database	B. Performance information about queries
C. List of catalog views and system procedures related to Query Store	D. All of these
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 550, Heading 20.2.4	

Q.2 The control Node in Polybase architecture is similar to _____ in the Hadoop architecture.	
A. Data node	B. Name node
C. MapReduce	D. Task tracker
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 539	

Q.3 Which of the following are file formats that Polybase supports?	
A. Delimited text	B. Hive RCFile
C. Hive OCR	D. All of these
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 544, Point no 4	

Q.4 _____ is a SQL Server Counter that stores the amount of time CPU has been executing SQL server code.	
A. @@Connections	B. @@CPU_BUSY
C. @@PACKET_ERRORS	D. @@PACKET_TRACE
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 565, Table 21.2	

Q.5 Which Keyword is used in a SELECT query to prevent the retrieval of duplicate records?	
A. TOP	B. ONLY
C. UNIQUE	D. DISTINCT
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 167, Heading 8.3.4	

Q.6 The _____ clause positions the result set into one or more subsets.	
A. ORDER BY	B. GROUP BY
C. WHERE	D. FROM
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 173, Heading 8.3.8	

Prepared By Abrar Ahmed

Q.7 System stored procedure logically appear in the _____ schema of the system and user-defined databases and have the _____ prefix.	
A. Sp_, sys	B. _sp, sys
C. Sys, sp_	D. Sys, _sp
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 258	

Q.8 In SQL server 2012, the size of each data page is _____ Kilo Bytes (KB).	
A. 2	B. 6
C. 12	D. 8
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 282, Heading 11.1.1	

Q.9 A _____ is a virtual table that is made up of selected columns from one or more tables.	
A. Stored procedure	B. View
C. Function	D. Query
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 238, Heading 10.2	

Q.10 _____ functions are used to assist with the summarization of large volumes of data?	
A. Rowset	B. Ranking
C. Scaler	D. Aggregate
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 92, Heading 5.5.2	

Q.11 Which one of the following files contains a set of SQL commands?	
A. Solution	B. Text
C. Script	D. Project
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 65, Heading 3.8	

Q.12 A _____ is a stored procedure that is executed when an attempt is made to modify data in a table protected by trigger.	
A. Trigger	B. Function
C. Query	D. Procedure
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 359	

Prepared By Abrar Ahmed

Q.13 Which of the following are disadvantages of File-based systems? [Multiple Choice]	
A. Integrity problems	B. Data isolation
C. Security problems	D. Sharing stored data
Correct Answer: A, B, C	
Reference: Book name: SQL Server Inside Out, Page no 4	

Q.14 Identify the statements that control permissions. [Multiple Choice]	
A. GRANT	B. REVOKE
C. INVOKE	D. DENY
Correct Answer: A, B, D	
Reference: Book name: SQL Server Inside Out, Page no 87, Heading 5.3.3	

Q.15 Identify the code snippet that shrinks the database.	
A. ALTER DATABASE CUST_DB SET AUTO_SHRINK OFF	B. ALTER DATABASE CUST_DB AUTO_SHRINK ON
C. DROP DATABASE CUST_DB SET AUTO_SHRINK ON	D. ALTER DATABASE CUST_DB SET AUTO_SHRINK OFF
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 113, Code Snippet 4	

Q.16 Which of the following code snippets add a filegroup to an existing database, called EMP_DB?	
A. ALTER DATABASE EMP_DB DELETE FILEGROUP FG_ReadOnly	B. ALTER DATABASE EMP_DB ADD FILEGROUP FG_ReadOnly
C. ALTER DATABASE EMP_DB SELECT FILEGROUP FG_ReadOnly	D. ALTER DATABASE EMP_DB INSERT FILEGROUP FG_ReadOnly
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 117, Code Snippet 6	

Q.17 _____ accomplishes real-time I/O encrypting and decrypting of data and log files.	
A. Row-level security	B. Column Master Keys
C. TDE	D. DDM
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 517	

Prepared By Abrar Ahmed

Q.18 Match the column							
SI NO	Left Column	SI NO	Right Column	Correct Answer for Column A			
A1	SQLCMD	B1	Used to monitor an instance of the Database Engine or Analysis Services.	B1	B2	B3	B4
A2	SQL Server Profiler	B2	Used to add, remove, and modify SQL Server programs.	B1	B2	B3	B4
A3	SQL Server Data Tools	B3	A command-line tool that can be used in place of SSMS.	B1	B2	B3	B4
A4	SQL Server Installation Center	B4	An Integrated Development Environment (IDE) used for Business Intelligence Components.	B1	B2	B3	B4
Reference: Bookname: SQL Server Inside Out, Page no 57, Table 3.1							

Q.19 Identify the code snippet that creates a DDL trigger for dropping and altering a table.	
A. CREATE TRIGGER trgSecure ON DATABASE FOR DELETE, ALTER TABLE AS PRINT You must disable Trigger "'trgSecure'" to drop or alter tables!' ROLLBACK;	B. CREATE TRIGGER trgSecure ON DATABASE FOR DROP_TABLE, ALTER_TABLE AS PRINT You must disable Trigger "'trgSecure'" to drop or alter tables!' ROLLBACK
C. CREATE TRIGGER trgSecure ON DATABASE FOR DELETE_TABLE, MODIFY_TABLE AS PRINT You must disable Trigger "'trgSecure'" to drop or alter tables!' ROLLBACK	D. CREATE TRIGGER trgSecure ON DATABASE FOR RENAME, MODIFY TABLE AS PRINT You must disable Trigger "'trgSecure'" to drop or alter tables!' ROLLBACK
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 350, Code Snippet 21	

Q.20 Which of the following statements about Second Normal Form are true? (Choose 3 correct answers)	
A. They meet the requirements of the first normal form	B. There are no partial dependencies in the tables
C. The tables should not have transitive dependencies in them	D. The tables are related through foreign keys
Correct Answer: A, B, D	
Reference: Book name: SQL Server Inside Out, Page no 43, Heading 2.4.2	

Prepared By Abrar Ahmed

Q.21 Which of the following code snippets creates a clustered index, IX_EmployeeID, on the EmployeeID column in the Employee_Details table?	
A. CREATE INDEX IX_EmployeeID ON Employee_Details(EmployeeID)	B. CREATE NONCLUSTERED INDEX IX_EmployeeID ON Employee_Details(EmployeeID)
C. CREATE UNIQUE INDEX IX_EmployeeID ON Employee_Details(EmployeeID)	D. CREATE CLUSTERED INDEX IX_EmployeeID ON Employee_Details(EmployeeID)
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 291, Heading 11.2.6	

Q.22 Which of the following trace flag is used to allocate database objects to only Uniform Extents?	
A. 1140	B. 1117
C. 1118	D. None of these
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 489, Heading 18.1.5	

Q.23 When few changes are made to a query and an error occurred in the production environment but not in the test environment, which of the following features would be most helpful to troubleshoot the problem?	
A. Polybase	B. Query Store
C. Stretch Database	D. Compare Execution Plans
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 491, Heading 18.2	

Q.24 Which of the following type of encryption is more secure?	
A. Deterministic	B. Randomized and Deterministic
C. Randomized and Optimized	D. Randomized
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 510, Heading 19.2.1	

Q.25 Sensitive data stored in database is encrypted with _____	
A. Column Master Keys	B. Column Encryption keys
C. Column Master and Column Encrypted keys	D. Column Master and Column Decrypted keys
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 510, Heading 19.2.1	

Q.26 Entity sets that have enough attribute to establish a primary key are called _____ entity	
A. Weak	B. Dependent
C. dominant	D. strong
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 36	

Prepared By Abrar Ahmed

Q.27 _____ is an attribute or a combination of attribute that uniquely defines each tuple in a relation.	
A. Foreign Key	B. Primary key
C. Tuple	D. Relation
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 35	

Q.28 The _____ function returns the level of nesting of the current procedure.	
A. @@NESTLEVEL	B. @@ERROR_LINE
C. @LEVEL	D. @NESTINGLEVEL
Correct Answer: A	
Reference: Book name: SQL Server Inside Out, Page no 270, Heading 10.15.1	

Q.29 Which statement starts the error processing for a session and displays an error message?	
A. EXECUTEERROR	B. SETERROR
C. STARTERROR	D. RAISERROR
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 436, Heading 15.7	

Q.30 Which trigger execute stored procedures when a session is established with a LOGON event?	
A. Login triggers	B. Logon triggers
C. Log triggers	D. Logged triggers
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 328	

Q.31 A _____ is an association or bond that exists between one or more entities.	
A. Entity	B. Attribute
C. Relationship	D. Property
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 29, Heading 2.3	

Q.32 _____ is an aggregate operator that produces a super aggregate row.	
A. GROUPING_ID	B. ROLLUP
C. GROUPING SET	D. CUBE
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 195, Heading 9.3	

Q.33 Stored procedures return information to the calling procedure using the _____ keyword.	
A. @@ERROR	B. @@ERROR_LINE
C. OUTPUT	D. RETURN
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 264	

Prepared By Abrar Ahmed

Q.34 A column with a _____ allows a null value to be inserted once.	
A. Primary Key constraint	B. Identity property
C. Unique constraint	D. Check constraint
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 150, Heading 7.4.2	

Q.35 Which error option sets the ERROR_NUMBER and @@ERROR values to msg_id or 5000 irrespective of the severity level?	
A. LOG	B. SETERROR
C. NOWAIT	D. ERROR_NUMBER
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 437, Table no 15.1	

Q.36 The _____ statement is not supported by SQL Azure due to which the user cannot switch between databases in SQL Azure.	
A. Update	B. Use
C. Insert	D. Alter
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 77, Heading 4.4	

Q.37 _____ locks are used by Database Engine while performing a table DDL operation such as dropping a table or a column.	
A. Intent	B. Exclusive
C. Schema modification	D. Shared
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 417	

Q.38 Values for a _____ column are automatically generated.	
A. Identity	B. Null
C. Default	D. GUID
Correct Answer: A	
Reference: Book name: SQL Server Inside Out, Page no 145, Heading 7.3.7	

Prepared By Abrar Ahmed

Q.39 Match the column							
SI NO	Left Column	SI NO	Right Column	Correct Answer for Column A			
A1	Flat- File Model	B1	In this model, data is stored in sets, instead of the hierarchical tree format.	B1	B2	B3	B4
A2	Hierarchical Data Model	B2	In this model, data is maintained in the form of tables consisting of rows and columns	B1	B2	B3	B4
A3	Network Data Model	B3	In this model, different records are inter-related through hierarchical or tree like structure	B1	B2	B3	B4
A4	Relational Data Model	B4	In this model, the database consists of only one table or file.	B1	B2	B3	B4
Reference: Bookname: SQL Server Inside Out, Page no 10-13							

Q.40 Which of the following Transact-SQL statements are used to set and declare local variables? (Choose 3 correct answers)	
A. USE	B. DECLARE
C. SET	D. SELECT
Correct Answer: B,C,D	
Reference: Book name: SQL Server Inside Out, Page no 367-369	

Q.41 Identify the steps in which data modelling can be broken down [Multiple Choice]	
A. Object Modelling	B. Conceptual Data Modeling
C. Logical Data Modeling	D. Physical Data Modeling
Correct Answer: B, C, D	
Reference: Book name: SQL Server Inside Out, Page no 28, Heading 2.2	

Q.42 AlwaysOn feature was first introduced in SQL server version	
A. 2000	B. 2005
C. 2008	D. 2012
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 477, Heading 17.4	

Prepared By Abrar Ahmed

Q.43 Which version of SQL Server 2016 is free and offers basic features?	
A. Enterprise	B. Web
C. Express	D. Developer
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 462	

Q.44 Hadoop is data storage methodology which supports _____	
A. Data Warehousing	B. Data Analytics
C. Data Querying	D. Data indexing
Correct Answer: A	
Reference: Book name: SQL Server Inside Out, Page no 454, Heading 16.1.1	

Q.45 Enhanced features in SQL Server 2016 are [Multiple Choice]	
A. AlwaysOn	B. T-SQL
C. DDM	D. Row Level Security
Correct Answer: A, B, D	
Reference: Book name: SQL Server Inside Out, Page no 464	

Q.46 The evolution of _____ has contributed to enormous growth of data	
A. Internet of things (IOT)	B. Business
C. Computers	D. Databases
Correct Answer: A	
Reference: Book name: SQL Server Inside Out, Page no 464, Heading 17.2	

Q.47 A _____ attribute may itself contain two or more attributes, which represent basic attributes having independent meanings of their own	
A. Multi-valued	B. Composite
C. Derived	D. Dependent
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 38	

Q.48 A _____ is used to group related files that together store a database object	
A. datafile	B. metadata
C. filegroup	D. datasheet
Correct Answer: C	
Reference: Book name: SQL Server Inside Out, Page no 114, Heading 6.4.2	

Prepared By Abrar Ahmed

Q.49 _____ is a language that is used for data science and advance analytics.	
A. C	B. R
C. Java	D. C#
Correct Answer: B	
Reference: Book name: SQL Server Inside Out, Page no 571	

Q.50 _____ option can be added to control the degree of parallelism	
A. TRUNCATE_TABLE	B. DROP IF
C. SESSION_CONTEXT	D. MAXDOP
Correct Answer: D	
Reference: Book name: SQL Server Inside Out, Page no 571	

Q.51 Which of the following xml data type methods are used with Xquery? [Multiple Choice]	
A. Nonquery()	B. Query()
C. Value()	D. Exist()
Correct Answer: B,C,D	
Reference: Book name: SQL Server Inside Out, Page no 183-184, Heading 8.5.3	

Q.52 Identify the code snippet that creates a stored procedure NestedProcedure which calls two other stored procedures.	
A. CREATE PROCEDURE NestedProcedure AS BEGIN EXEC uspGetCustDetails EXEC uspGetSales 'Germany' END	B. CREATE PROCEDURE NestedProcedure AS BEGIN SELECT uspGetCustDetails END
C. CREATE PROCEDURE NestedProcedure AS BEGIN EXE uspGetCustDetalls EXE uspGetSales 'Germany' END	D. CREATE PROCEDURE NestedProcedure AS BEGIN CREATE PROCEDURE uspeetCustDetals CREATE PROCEDURE uspGetSales 'Germany' END
Correct Answer: A	
Reference: Book name: SQL Server Inside Out, Page no 270, Heading 10.15	

Q.53 Which of the following code snippets creates a table that uses the DEFAULT keyword to define the default value for marks?	
A. CREATE TABLE Student(StudentID int NOT NULL. Name varchar(40) NOT NULL Marks Int NOT NULL DEFAULT (100))	B. CREATE TABLE Student(StudentID int NOT NULL. Name varchar(40) NOT NULL Marks Int NOT NULL)
C. CREATE TABLE Student(StudentID int NOT NULL, Name Ikirchar(40) NOT NULL Marks In NOT NULL DEFAULT)	D. CREATE TABLE Student(StudentID int NOT NULL, Name varchar(40) NOT NULL Marks in NOT NULL IDE NTITY)
Correct Answer: A	
Reference: Book name: SQL Server Inside Out, Page no 144, Heading 7.3.6	

Prepared By Abrar Ahmed

Q.54 Which of the following code snippets creates a CHECK constraint to ensure that the Amount value will always be non-zero?

- | | |
|--|--|
| <p>A. CREATE TABLE EMP_PhoneExpenses (Expense_ID int PRIMARY KEY, MobileNurnber bigint FOREIGN KEY REFERENCES EMP_ContactPhone (MobileNtrnber), Amount bigint)</p> | <p>B. CREATE TABLE EMP_PrioneExpenses (Expense_ID Int PRIMARY KEY, MobileNurnber bigint FOREIGN KEY REFERENCES EMP_contactPhone (MobileNumber), Amount bigint NO CHECK (Amount >10))</p> |
| <p>C. CREATE TABLE EMP_PhoneExpenses (Expense_ID int PRIMARY KEY, MottleNtEnber bigint FOREIGN KEY REFERENCES EMP_ContactPhone (MobileNurnrr), Amount bigint (Amount >10))</p> | <p>D. CREATE TABLE EMP_PhoneExpenses (Expense_ID int PRIMARY KEY, MobileNurnber bigint FOREIGN KEY REFERENCES EMP ContactPhone (MotileNumber), Amount bigint CHECK (Amount >10))</p> |

Correct Answer: D

Reference: Book name: SQL Server Inside Out, Page no 153, Code Snippet 23

Q.55 Which of the following system databases are supported by SQL Server 2012? [Multiple Choice]

- | | |
|----------|-------------|
| A. msdb | B. resource |
| C. model | D. local |

Correct Answer: A, B, C

Reference: Book name: SQL Server Inside Out, Page no 107, Table 6.1

Q.56 Which of the following code snippets list all the product ids of both tables that match with each other using the UNION operator?

- | | |
|--|---|
| <p>A. SELECT ProductId FROM Product INTERSECT SELECT ProductId FROM SalesOrderDetail</p> | <p>B. SELECT ProductId FROM Product EXCEPT SELECT ProductId FROM SalesOrderDetail</p> |
| <p>C. SELECT ProductId FROM Product UNION SELECT ProductId FROM SalesOrderDetail</p> | <p>D. SELECT ProductId FROM Product MERGE SELECT ProductId FROM SalesOrderDetail</p> |

Correct Answer: C

Reference: Book name: SQL Server Inside Out, Page no 224, Heading 9.9.1, Code Snippet no 10

Q.57 Hot data means

- | | |
|--------------------------------|-------------------------|
| A. Data which is not processed | B. Data being processed |
| C. Data not in use | D. Data in database |

Correct Answer: B

Reference: Book name: SQL Server Inside Out, Direct reference not available

Q.58 JSON provides data exchange format which is [Multiple Choice]

- | | |
|-----------------------------|-------------------------|
| A. Language independent | B. Light weight |
| C. Human readable text data | D. Subset of javascript |

Correct Answer: A, B, C

Prepared By Abrar Ahmed

Reference: Book name: SQL Server Inside Out, Page no 471, Heading 17.3

Q.59 Which of the following are primary uses of tempdb?

- | | |
|--------------------------------------|------------------------------------|
| A. Store local tables temporarily | B. Store global tables temporarily |
| C. Store table variables and cursors | D. All of these |

Correct Answer: D

Reference: Book name: SQL Server Inside Out, Page no 488, Heading 18.1.1

Q.60 Identify the correct syntax to drop a table

- | | |
|----------------------------|----------------------------|
| A. DROP <Table_Name> | B. <Table_Name> DROP |
| C. DROP TABLE <Table_Name> | D. DROP TABLE <Table_Name> |

Correct Answer: D

Reference: Book name: SQL Server Inside Out, Page no 141, Heading 7.3.3

Q.61 Match the column

SI NO	Left Column	SI NO	Right Column	Correct Answer for Column A			
A1	Master	B1	The database is used as the template for all databases in SQL Server 2012	B1	B2	B3	B4
A2	Model	B2	The database holds temporary objects or intermediate resultsets	B1	B2	B3	B4
A3	Resource	B3	The database records all system-level information of an instance of SQL Server	B1	B2	B3	B4
A4	tempdb	B4	The database is a read-only database and contains system objects included with SQL Server 2012.	B1	B2	B3	B4

Reference: Book name: SQL Server Inside Out, Page no 107, Table 6.1

Q.62 A _____ is a collection of one or more Transact-SQL statements that are sent as one unit from an application to the server.

- | | |
|--------------|-------------|
| A. Script | B. Batch |
| C. Procedure | D. Function |

Correct Answer: B

Reference: Book name: SQL Server Inside Out, Page no 364

Prepared By Abrar Ahmed

Q.63 Identify the correct syntax to create a view with check option	
A. CREATE VIEW <view_name> AS select_statement [CHECK]	B. CREATE VIEW <view_name> AS select_statement [WITH CHECK]
C. CREATE VIEW <view_name> AS select_statement [WITH CHECK OPTION ON]	D. CREATE VIEW <view_name> AS select_statement [WITH CHECK OPTION]
Correct Answer: D	

Q64 How does SQL Server ensure an even distribution of 'writes'? [Multiple Choice]	
A. Uses Proportional Fill method to decide the file for 'write'	B. Round-robins through the write files
C. Writes to a single file each time	D. All of these
Correct Answer: A, B	
Reference: Book name: SQL Server Inside Out, Page no 488	

Q.65 Match the column							
SI NO	Left Column	SI NO	Right Column	Correct Answer for Column A			
A1	PERIOD FOR SYSTEM_TIME	B1	Loss of history data	B1	B2	B3	B4
A2	ALTER TABLE dbo.BankAccount SET (SYSTEM_VERSIONING=OFF)	B2	Temporal tables	B1	B2	B3	B4
A3	Tempdb tables	B3	Mixed extents	B1	B2	B3	B4
A4	Non-tempdbtables	B4	Uniform extents	B1	B2	B3	B4
Reference: Book name: SQL Server Inside Out, Direct Reference not available							

Q66 The requirement for the database to be added to availability group is that the database should be [Multiple Choice]	
A. Online	B. Read-write
C. Reside on the server instance having the primary replica	D. Offline
Correct Answer: A, B, C	
Reference: Book name: SQL Server Inside Out, Page no 478, Heading 17.4.1	

Prepared By Abrar Ahmed

Q.67 Consider the following SELECT statement:

SELECT City FROM EmployeeDetails WHERE City LIKE '%C%'

What would be its output?

A. List of all cities beginning with letter 'C'

B. List of all cities with 'C' anywhere in the name

C. List of all cities ending with 'C'

D. List of all cities not having 'C' anywhere in the name

Correct Answer: B

Reference: Book name: SQL Server Inside Out, No direct reference available

Q.68 Arrange the following in proper sequence to perform real-time operational analytics

1. Set up Analytics framework to fetch data directly from Operational Workload.
2. Identify the table(s) and the columns required to run analytics
3. Create columnstore indexes for the tables.

A. (3), (2), and (1)

B. (2), (3), and (1)

C. (1), (3), and (2)

D. (3), (1), and (2)

Correct Answer: B

Reference: Book name: SQL Server Inside Out, Page no 469

Q.69 Which of the following statements about Polybase are true? [Multiple Choice]

A. Polybase enables relational and non-relational data to be combined.

B. Polybase runs queries on the external data source

C. Polybase allows tables to be migrated to an external database

D. None of these

Correct Answer: A, B

Reference: Book name: SQL Server Inside Out, Page no 538, Heading 20.1

Q.70 Which of the following are advantages of Stretch Database? [Multiple Choice]

A. Migrate historical data to Azure

B. Economical solution for long-term storage of data

C. Combine non-relational data and relational data

D. Cost reduction in storage of data

Correct Answer: A, B

Reference: Book name: SQL Server Inside Out, Page no 551, Heading 20.2.5
