Application Development Using XCode

Q1. When adding a new class file, which one of the following should a user perform after writing the necessary code?	
A. Declare the function in the _h file	B. Define them in the _m file
C. Add the import statement to the original class file	D. Provide the file name
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 99	

Q2. You need to create a copy of the selected file or folder in the workspace. Which one of the following options will you choose?	
A. Copy items into destination group's folder	B. Create groups for any added folders
C. Create folder references for any added folders	D. Add to targets
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 101	

Q3. Which one of the following options permanently deletes a file?	
A. Move to Trash	B. Delete
C. cancel	D. Remove Reference
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 104	

Q4. The _____ window is used to manage iOS device information, repositories, and documentation _	
A. Debug	B. Utility
C. Organizer	D. Activity Viewer
Correct Answer: C	
Reference: Book name: Application Development Using XCode, Page no 11	

Q5. Quick Help can be accessed from _____	
A. Navigation area	B. Utility area
C. XCode toolbar	D. Assistant Editor
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 12	

Q6. The _____ is used to automate memory management for Objective-C objects.	
A. Nib file	B. Storyboards
C. Unit tests	D. ARC
Correct Answer: D	
Reference: Book name: Application Development Using XCode, No direct reference	

Prepared By Abrar Ahmed

Q7. The _____ is a build plan.	
A. Scheme	B. Target
C. File Owner	D. Group
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 64, Heading 4.4	

Q8. The Organizer icon Documentation option in the Organizer window helps display_____	
A. Binary indexes for the files and symbols	B. Doc set
C. Documentation Viewer	D. Archives
Correct Answer: D	
Reference: Book name: Application Development Using XCode, No direct reference	

Q9. .m stands for_____ file.	
A. Metadata	B. Main
C. Meta	D. Mystring
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 61	

Q10. _____ is server based.	
A. Subversion	B. GIT
C. SCM	D. Repository
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 130,Heading 8.6	

Q11. In the Project Navigator, what does XCode assign to files to track the version control status?	
A. Description	B. Color
C. Badge	D. Groups
Correct Answer: C	
Reference: Book name: Application Development Using XCode, Page no 131	

Q12. Which one of the following reduces the memory footprint of a system?	
A. Framework	B. Routine
C. Method	D. Resource
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 95	

Q13. Complete reference documentation for a symbol can be accessed from the_____	
A. Project Navigator	B. Inspector Pane
C. Activity Viewer	D. Variables Pane
Correct Answer: B	

Prepared By Abrar Ahmed

Q14. Which one of the following does XCode provide for code completion if a method or function contains parameters or arguments?

- | | |
|-----------------------|-------------------|
| A. Placeholder | B. Jump Bars |
| C. Inline suggestions | D. Fix-it feature |

Correct Answer: A

Reference: Book name: Application Development Using XCode, Page no 121

Q15. What does XCode automatically create for each target when a new project is created?

- | | |
|---------------|--------------|
| A. Identifier | B. .m file |
| C. Scheme | D. Framework |

Correct Answer: C

Reference: Book name: Application Development Using XCode, Page no 64

Q.16 A storyboard includes a sequence of _____

- | | |
|------------|----------------|
| A. Objects | B. Controllers |
| C. Scenes | D. Views |

Correct Answer: C

Reference: Book name: Application Development Using XCode, Page no 149, Heading 9.2

Q.17 What does a thread refer to?

- | | |
|-----------------------------|------------------------------------|
| A. Program's console output | B. Separate path of code execution |
| C. Issues | D. Logs |

Correct Answer: B

Reference: Book name: Application Development Using XCode, Page no 167, Heading 10.3

Q.18 Identify the XCode feature that highlights common coding mistakes.

- | | |
|----------------|-----------------------|
| A. Quick help | B. Static Analysis |
| C. Live Issues | D. Graphical Debugger |

Correct Answer: C

Reference: Book name: Application Development Using XCode, Page no 12

Q.19 Which one of these will you use to view threads and stacks?

- | | |
|----------------------|---------------------|
| A. Debug navigator | B. Issue navigator |
| C. Project navigator | D. Symbol navigator |

Correct Answer: A

Reference: Book name: Application Development Using XCode, Page no 175, Heading 10.10

Q.20 The subversion command to create a working copy to Checkout. Identify the equivalent command in Git to do so

- | | |
|-----------|-----------|
| A. Clone | B. Pull |
| C. Update | D. Commit |

Correct Answer: C

Reference: Book name: Application Development Using XCode, Page no 129, Table 8.1

Prepared By Abrar Ahmed

Q.21 Identify the command to create an empty repository in GIT	
A. git	B. git init
C. init git	D. gitinit
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 132	
Q.22 _____ is the primary programming language to write code for creating software for OSX and IOS.	
A. Objective C	B. C++
C. C	D. Cocoa
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 95, Heading 6.2	
Q.23 A function is declared in the _____ file.	
A. .m	B. .h
C. .c	D. .i
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 61	
Q.24 User interface files in the project can have .nib or _____ as the filename extension.	
A. .xib	B. .x
C. .xi	D. .xb
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Page no 13, Heading 1.5.1	
Q.25 In the Model-View-Controller design pattern which one of the following helps edit data?	
A. Model	B. View
C. Controller	D. Model and View
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 13	
Q.26 Which one of the following should a developer have to download the latest software development kits, development tools and example code from Apple?	
A. Ad hoc provisioning profile	B. Developer account
C. Identifier	D. AppDelegate files
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 20	
Q.27 Identify the function of the instruments app	
A. Design a user interface	B. Compare performance data graphically in real time to optimize the application
C. Test and debug the application locally on the Mac	D. Distribute apps on the App Store
Correct Answer: B	
Reference: Book name: Application Development Using XCode, Page no 177	
Q.28 Identify the type of breakpoint that a user can use to stop when a specific function or method starts executing. [Multiple Choice]	
A. File Line Breakpoint	B. Exception Breakpoint
C. Symbolic Breakpoint	D. Symbol Breakpoint

Prepared By Abrar Ahmed

Correct Answer: A,B,C
Reference: Book name: Application Development Using XCode, Page no 171

Q.29 Identify the code that uninstalls, the previous versions of xcode earlier than 4.3 from a Mac.	
A. Sudo/Developer/Library/uninstall-devtools --mode=all	B. Sudo/Developer /uninstall-devtools --mode=all
C. Sudo/ Library/uninstall-devtools --mode=all	D. Sudo/Developer/Library/uninstall-devtools --mode
Correct Answer: A	
Reference: Book name: Application Development Using XCode, Direct reference not available.
